

FINANCIAL PLANNING FOR MOMS

This 6-week financial planning series examines the special needs and concerns for moms and soon-to-be moms. All six classes focus on the special financial planning approaches necessary for women with children. Individual sessions will concentrate on why planning now will help in the future. We will discuss the importance of making sure our children understand finances and the importance of being prepared to save funds for college. In addition, we will examine the differences in how women invest, what insurances are needed, as well as how women's estate planning needs differ from men's.
