Dear Messrs. Dunbar, Waterman, and Fieo:

The Department of Environmental Protection (Department) received a document titled "Middle Interceptor Alternative Analysis," dated August 2, 2010, prepared by Bursich Associates, Inc. The document presents the Lower Perkiomen Valley Regional Sewer Authority's (LPVRSAs) analysis of why the Oaks Middle Interceptor should be located along the route presented in LPVRSAs Water Quality Management permit application.

By letter dated April 30, 2010, the Department informed you that the above-referenced Water Quality Management permit application was inconsistent with applicable municipal Act 537 Plans. Further, we indicated at a meeting held in LPVRSAs office on April 28, 2010, that the permit application's proposed location of the interceptor would have to obtain each affected municipalities' approved updated official sewage facilities plan to provide for this location. ←

Until such planning is approved by the Department, we will consider this information to be advisory in nature, and we will be unable to issue your Water Quality Management permit.

Mr. Joseph C. Dunbar, C.P.M., Manager  
Mr. George W. Waterman, III, Manager  
Mr. Robert Fico, Chairman
